HARRISONS' NURSERIES

HARRISON BROTHERS, PROPS.
BERLIN, MARYLAND

FOUNDED 1864
A Message from HARRISONS'

Our Friends:

Have you a copy of Harrison's first catalog issued sixty-one years ago? It contained the best varieties of its time.

Yes, today it would be obsolete. This is primarily due to the advancement of the practical method of bud selection from trees of superior strains and extra heavy bearing habits originated by Harrisons, combined with other propagation improvements fostered by leading horticulturists, as well as Federal-State Experimental Stations.

Apples, Peaches, Plums, etc.—yes! The entire list shows marvelous progress. An infinite number of new varieties, many of them superior in strain, form, color and size, await the planter.

However, this abundance of new varieties has tended to confuse the problem of selection. The Harrison organization have assumed the responsibility of choosing the best, after careful scientific and practical tests, thus avoiding those varieties that lack merit, that would produce uncertain results, consequently protecting our customers. With this objective, the Harrisons' have discarded hundreds of varieties, both old and new, and have limited themselves to cataloging only the best in every group, from the standpoint of performance and superiority.

HARRISONS' Fruit Trees and Small Fruits are TRUE TO NAME, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our ornamentals are of the finest types for their respective varieties.

We send you this catalog in the hope that you will take advantage of our high quality nursery stock which we are offering for 1945.

Appreciatively yours,

HARRISONS' NURSERIES,

Harrison Brothers, Props.

G. Hale Harrison, General Manager.

---

Save Years of Waiting

Bud-Selection Puts Whole Root Propagation Gives Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients to get to the trees and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method, but results are what count.

You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

Growing practices do make a difference.

Now is the Time to Plant

United States Government authorities are urging a large increase of Family Tree Plantings to take care of the alarming decline of fruit production.

Health authorities recommend eating twice as much vitamin-packed fruit. Many well known authorities predict that worldwide fruit production will be so low that only those who grow their own will have enough to supply their family requirements.

Make your planting this season. Use Harrisons' early-to-bear trees and plants.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 61 years the Harrisons' nursery has been supplying fruit trees to the ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-year-out customers, are proof that Harrisons' Fruit Trees can be depended on. Harrisons' Fruit Trees buy them without risk and with assurance they will yield you the greatest possible profit.

---

This is Your PROTECTION

Every customer is assured of Harrisons' High Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace any nursery stock that dies from unavoidable causes at half price if notified within two months after its arrival.

HARRISONS' NURSERIES.

---

Gardening for Victory

Throughout America, millions and millions of Americans are turning to the soil to produce fruit and food for their tables and to ornamentals for relaxation from mental strains and over work. Fruit is food. Grow your own, make preparations to use as much food as possible. Food will win the war and write the peace.

We are trying to do our part by growing thousands and thousands of bushes of apples, peaches, soy beans, corn, etc., as well as fruit trees, small fruit ornamentals, etc., that are capable of producing a lot of food and pleasure to thousands and thousands of people on the home front.

---

PLANT HARRISONS' SUPER-STRAIN SELECTED TREES

GROWN AT BERLIN, MARYLAND

---

Cutting Buds

Harrisons' "Bud Strains" start fifty years ago and almost every year since Harisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-name varieties were assured.

---

PLANT HARRISONS' SUPER-STRAIN SELECTED TREES

GROWN AT BERLIN, MARYLAND

---

Happy New Year!
NOW everyone can grow extra large rich colored, extra rich flavored, healthful, VITAMIN PACKED FRUIT in his own back yard.

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal for the home garden.

Your Selection. Can be assorted varieties—apples, peaches, plums, and nectarines—consisting of only the varieties as listed on this page.

Harrisons’—The Nation’s Fruit Tree Nurseries
Apple Growing Pays Profits

But in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merit is it possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, the finest and by far the best quality produced on the North American Continent.

RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. A few years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty-one years of dependable and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud selected" fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

True to Name

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

HARRISONS' "BUD SELECTION" FROM SUPERIOR STRAIN TREES

Young fruit trees, budded from selected trees in full fruit, are definitely superior to any other method of propagation. Careful examination and selection of healthy, heavily branched, heavy-yielding trees are without question the best parent trees to supply the buds for young tree inheritance.

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farm—little orchards lead the way to a profitable and worth while fruit market.
More fruit prizes are won on fruit grown in orchards planted with Harrisons' fruit trees than any other.

Yellow Transparent
It's a Summer Apple—First of the Year

Ripens Early, Skin Clear Yellow, Flesh White, Flavor Slightly Acid, Size Medium

This is the most popular early green apple grown and has proven a profit maker in a large number of apple districts. The Transparent tree is very hardy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First On The Market
As it ripens early in July, making excellent eating apples and selling with difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their 'apple appetites' impatient.

OTHER SUMMER APPLES

RED SUMMER RAMBO. Harrisons' new early coloring, bud 'spit'. This new strain is much superior to the ordinary Summer Rambo.

WEALTHY. Medium to large size; round; almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

GREAT FALL AND WINTER APPLES

STAYMAN WINESAP Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

TWENTY OUNCE. Very large, yellow striped with red; fine quality, good keeper.

WINESAP An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

 YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy on an unusually heavy bearer.

CRAB APPLES

Priced on Page 4

Double Purpose—An Ornamental and Fruit Tree Combined

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree hand-pruned.

TRANSCENDENT. Yellow striped with red; good for eating fresh and for preserving. Best of all crab apples. Tree large; quick grower.

YOUNG AMERICAN. Attractive red fruit of excellent size and quality. Good as ornamental.

PLANT BIG TREES for QUICKEST and BEST RESULTS

BRIGHT RED JONATHAN
We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

THE APPALACHIAN WINNER

RED YORKING

(U. S. Plant Patent No. 125)
The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Penna., for use in planting a large orchard about 40 years ago.

SCARLET RED STAYMAN—Tops with Many Growers

SUPER RED MCINTOSH—A Northern Favorite

BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

Hansens Improved
Bush Cherry
An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansens of the South Dakota Experimental Station. Leaves are silvery green, turning red in autumn. Attractive white blossoms add to landscape effect.

HARRISON BROTHERS NURSERIES
Founded 1884
BERLIN, MARYLAND
Over 4000 Acres
RED VARIETIES

Flavored Apples

HOME OR COMMERCIAL ORCHARDS

SOLID RED WINESAP
Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

RED ROME BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

MCINTOSH RED
Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh, our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored apple grown. Recommended for home or commercial orchard plantings.

GET YOUR ORCHARD STARTED THIS YEAR

RED SPY

A new “bud sport” from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

ALL APPLE TREES Priced on Pages 3, 4 and 21

TRIPLE RED DELICIOUS

Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons’ Triple Red Delicious to insure your future financial income.

Glorified Red Apple of the World

Ideal for Home Orchards

Harrisons’ Triple-Red Delicious is not only a commercial apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons’ Triple-Red Delicious will give full value.
LARGE TRANSPARENT (LODI)

A New Summer Variety
Ripens Very Early—Destined to Replace the Ever Popular Yellow Transparent

We believe there is a big future for this new summer apple. Our commercial friends should lose no time in anticipating the demand for an apple of this type. Somewhat of a dwarf grower, bearing very young fruit, it makes an excellent filler. The skin is a clear yellow, white-flesh, of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done — here's why: Yellow Transparent apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easily on its Big Brother, "LARGE TRANSPARENT," which ripens at the same time.

Large Transparent Apples Average Up to ½ Inch Larger Than Yellow Transparent — This Means 75c to $1.00 per Bushel Extra.

GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain
BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollenizer known, especially so for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS

It's Golden!

A golden yellow apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Large September and January finds it at its best. Many people think it superior to the famous Delicious, Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

DELICIOUS

SOMETIMES CALLED STARK DELICIOUS

This is the Original Strain of Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Fall

OTHER FAMOUS APPLES

EARLY McINTOSH. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from it in Gravenstein only in the solid dark red fruit. Late summer.

CORTLAND. A new variety resulting from cross pollination of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple approximately the same size and fine flavor of the McIntosh but ripens three weeks or a month later than keepers.

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

Harrisons' Super-Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

SPECIAL VARIETIES OF APPLES SUITABLE FOR COMMERCIAL PLANTERS IN VARIOUS LOCALITIES THROUGHOUT THE UNITED STATES

The following 45 varieties of apple trees were especially grown for commercial fruit growers, but an account of war conditions, we have been compelled to discontinue propagating these kinds. These are fine quality trees, true-to-name, and this will probably be your last opportunity to purchase any of these 45 varieties. If interested, suggest mailing your order promptly so that reservations can be made.

WILLIAMS' EARLY RED
The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities the fruit sells about as quick as it hits the market-house or dealer's store. It holds its own anywhere and has proven to be—

The Best Summer Apple
The rich bright red fruit catches the buyer's eye and is ordered at a price that yields the grower a good profit. The apple is large, with tender, crisp, white flesh, juicy and slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red.

WILLIAMS EARLY RED
Ready Early When Folks Just Get Hungry for Apples

Renowned for Bearing at an Early Age

(Below) CORTLAND
A New England Favorite

1945

BEST STRAINS OBTAINABLE REGARDLESS OF PRICE
The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

**The Reasons Back of Growing Superior Stock**

A—Our organization has over 60 years experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

**Plant Big Peach Trees During 1945 for Quickest and Best Results**

Grown on the "Brink" of the Atlantic

Real Hardy Grown Stock You Can Depend On

Our favorable climatic conditions, being located only 8 miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrison's to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit growing section of the United States.

**Fruit Growers**

Look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Hariisons' true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries—know what to buy. For best results, plant dependable Harrison-grown trees.

**True to Name**

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True-to-Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors at Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

May be assorted varieties of Peach Trees. For Jumbo Peach Trees, see page 3. For Mammoth Size Peach Trees, see page 14.

**A National Scarcity of Fruit Trees**

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1945 orchard plantings that there has been at any time during the past fifty years. A recent national survey shows that fruit trees will even be scarcer during the next coming two years than now. Play safe—act quick—place your order now while trees are available.
Harrisons’ Peaches
ARE A COLLECTION OF
THE WORLD’S BEST

VERY EARLY VARIETIES

JUNE ELBERTA. A big, handsome red and gold peach, highly col-
ored, excellent quality and a dandy home peach, being a new
variety. One of the earliest of the good yellow-fleshed peaches,
this semi-freestone variety quickly returns cash dividends before
later varieties reach the market.

EARLY ROSE. Very early. Another favorite commercial peach.
White, cling, medium large size for an early peach, high bright
red skin, sweet, delicious flavor. Good shipping, making it a
new favorite among commercial varieties.

GREENSBORO. White, freestone, extra large for such an early
Peach. One of the handsomest, being a large, yellowish white
with crimson cheek; flesh is white and of average quality. Ex-
ceedingly hardy, being an extra heavy, prolific bearer and
adapted for wide variations in Peach regions.

EARLY HALE-HAVEN. A bud sport of the well-known Hale-
Haven, retaining all its characteristics, such as large size, high
red color before ripening, extra fine flavor, and yet ripening a
week earlier. Tests show it will keep as good as the Hale-
Haven. A very promising new commercial variety. We recom-
mand every grower to plant a few trees so as to compare its
merits with other varieties ripening at the same time. We are
confident that you will like Early Hale-Haven and that it will
be a profitable peach for you to grow. Plant Patent No. 325.
Ten cents per tree extra.

Early Midseason Peaches

CHAMPION. A Good Home Peach. White, freestone, very large, creamy white with red
cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance
because it will not carry satisfactorily under refrigeration, but as a home garden or a
roadside peach, it is one of the best. Tree is hardy, large grower and productive.

GOLDEN EAST (N, J. 87). Early midseason, very large, high red color, yellow, freestone.

HILEY. Early midseason. Bears huge crops of
fancy peaches. White, freestone, medium
size, highly red colored and is a very hands-
some peach of exceptionally good flavor.
Tree is strong grower, very healthy and an
extra heavy bearer. You can depend on Hiley
to bear heavy crops year after year. The
marvelous color and wonderful flavor have
made it popular on the markets.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with
mottled red blush; flesh yellow stained with red at pit, very good
quality, prolific bearer. One of the best early midseason yellow
freestone peaches for nearby markets, and highly desirable for
canning.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, hands-
some, uniform size, delicate flavor, ripens about 15 to 18 days
ahead of Elberta. Tree is very hardy, good grower and a consistent
heavy bearer, adapted to cold climates; produces bumper crops in
mild climates.

VALIANT. Early midseason. Seedling of Elberta. Yellow free-
stone, productive. A new Canadian variety.

A typical peach orchard, with a specimen tree, showing habit of
growth, planted with Harrison grown trees from Berlin, Maryland.
Leading EARLY PEACHES

Golden Jubilee
Early. The supreme early yellow peach. Commercial peach orchardists for a century have been looking for an early peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carmen.

Hale-Haven
Early midseason. Ripens just after Golden Jubilee has been harvested and about 1-1/2 days ahead of Elberta Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

Red Bird
Earliest of All Peaches
Very early. White, cling, extra large with a bright red blush, the first peach of large size to ripen, the greatest very early money maker. Supply of trees is very limited for spring, 1945.

The Sensational REDHAVEN
Tops All Extra Early Peaches, Earliest Yellow Freestone Peach
The new early ripening yellow peach that ripens about 10 days before Golden Jubilee.

The most promising early ripening yellow freestone peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. Supply of trees is limited—order early.

Plant Big Trees for Quickest and Best Results

For Prices of All Peach Trees on This Page See Pages 3, 10, and 14.
Famous MIDSEASON PEACHES
All Excellent for Home Orchards

BELLE OF GEORGIA
Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and productive.

ELBERTA (Original Strain)
Internationally Famous—The Standard by Which All Other Peaches are Judged
Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only ORIGINAL STRAIN Elberta
Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

Original Strain J. H. HALE
Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut, and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

Grown by Harrison Brothers, Berlin, Maryland

For Prices of Peach Trees See Pages 3, 10, and 14
Bud Selected Super-Strain PEACHES

SALBERTA PEACH
Excellent Late Variety

Sullivan's EARLY ELBERTA
An Early Ripening Bud Sport of Elberta
MIDSEASON YELLOW FREESTONE

Here is the early ripening strain of genuine Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about 7 days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive to Elberta and is a good keeper. Good for either home or commercial planting.

Early Elberta
Early midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

Late Ripening Varieties
BRACKETT. Midseason late. The fruit is rich yellow with dark crimson cheek. Size is as large or larger than Elberta and much better flavored. Ripens 7 days later than Elberta.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 24 to 26 days later than Elberta, having some prominent coloring characteristics as its parent.

SALBERTA. A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many peach-growing sections. Ripens about 20 days later than Elberta.

SHIPPERS LATE RED. Midseason late. Large, round, yellow, freestone; very attractive. Ripens 3 days later than Elberta.

RIO-OSO-GEM. Late. See page 15 for description and prices. Starts to ripen 1-2 days later than Elberta.

VERY LATE RIPENING VARIETIES
KRUMMEL'S (Krummel's Late October). Yellow, freestone, extra large, round, deep yellow with a bluish carmine on the sunny side, fine flavor. Good shipper, and ripens late in the season.

SALWEY. Very late. Yellow, freestone.

It's Easy to Grow Delicious Healthful Peaches

Finest Strains—True-to-Name
Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, bearing the highest coloring of fruit, with extra heavy bearing habit, has made the greatest contribution in directing and fixing the characteristics of the yield; of perfecting color; increasing the size of the fruit and the volume, as well as regularity of the crop.

Harrison Brothers, Berlin, Maryland

RIO OSO GEM

The World’s Largest Peach

An amazing feature of the RIO-Oso-Gem is, it will take on a good bright red color and yellow background 2 weeks before ripening, and even 10 days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When RIO-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous RIO-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

RIO-Oso-Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. RIO-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety, superseding the famous Elberta of the Victorian era.

BIGGEST PEACH ON EARTH

The RIO-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2 3/4 to 3 3/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Rio Oso Gem—The Outstanding Profit Making Peach—THE BEST PEACH

[15]
BLAKEMORE
No strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Rips 100 or more pounds of strawberries every year. From every standpoint the plant is healthy and stands up well during hot weather. The berries are large, firm, attractive in size, good bloomers, and produce a long season of crops.

DORSETT, Early
Large Fruit—Vigorous Grower—Heavy Craps
Dorsett berries average in size, considerably larger than the Premier; in fact, their size is comparable with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, bringing more large fruit than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRFAX, Early
The Sugar-Saving Berry
Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

PREMIER
King of the Early Berries
To well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a leading plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local market, or for shipping moderate distances it has outclassed all other varieties.

BIG JOE
The Old Reliable Midseason Variety
LARGE YIELD—FANCY FRUIT—FINE FLAVOR
Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL
Midseason
A midseason berry that will produce the largest crop of bigger berries of any midseason variety we know. Cattskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptability. The highest percentage of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

CHESAPEAKE
The Favorite Late Berry
It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the earlier varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable commercial berry and equally adapted for home planting. We offer a selected “Big Yield” strain.

Here's a New One
\underline{RED STAR}
Extra Good—Very Late
This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short stout stems that stay well under the leaves thus protecting them from late frosts. Makes a good fruiting row and plenty of money can be made from growing this one as late berries always bring a high price.

Extra Good Fruits for the Home Garden

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best. EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon-colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

NECTARINES

Delicious for Eating

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow freestone. SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries with a mild, sweet flavor. Delicious for fancy desserts, sauces, preserves, pies, etc. Bushes lovely as shrubs. Small yellow bloom.

DOWNING (GREEN). Large greenish yellow variety favored for shipping and canning. Highly flavored. Large 1-yr. bushes, 1.00 each; 2 for $2.85; 5 for $5.40; 10 for $8.00.

CURRENTS

NEW RED LAKE. Big, sweet, fastest, get improved Red Currant on the market. Large bunches, produced in profusion. Extra heavy. WILDER. One of the strongest growers and most productive. Bunches very large, bright, attractive red color. Large 1-yr. bushes, $1.00 each; 2 for $3.85; 6 for $5.40; 10 for $8.00.

Harrisons' Everbearing MASTODON

A Triple Yield

3 REAL CROPS—3 BIG PROFITS

Bears in 90 days, and, too, it's the best Family Garden Strawberry

Yields of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries three months after planting and bears three big crops in eighteen months. Customers have reported yields as high as three quarts per plant the first fall.

Why Wait a Whole Year?

Plant Harrisons' "Big Yield" Mastodon this spring and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will always bring top prices.

Harrisons Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.
HARRISONS Profitable  EASY TO GROW

Montmorency
The most popular sour cherry grown in America. It ripens midseason, is large, red, slightly acid, flesh very tender, good quality. The best shipper of all sour cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.
EARLY RICHMOND. Exceedingly hardy and productive. 
ENGLISH MORELLO. Large, blackish red cherry. Hardy and productive. Very late.

HARRISON GROWN CHERRY TREES
Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well-proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

SWEET CHERRIES
What fruit is more pleasing than the sweet cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Midseason
BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early
GOLDEN WAX. Large, yellow, fine flavor. Bears bumber crops. Easily grown Midseason
GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor. 
LAMBERT. Extra large, sweet, jet black, very popular. Midseason
NAPOLEON (Royal Ann). Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.
SENICA. Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

HANSEN'S IMPROVED Bush Cherry
An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect. 3-yr. Bushes, Bearing Size, $1.50 each.
HARRISONS' FAMOUS PLUMS

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BRAEBURN. Midseason, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURLINGTON. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

CRAY PRUNE. (Italian.) Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE. Late. Commercial variety, purplish black, juicy, sweet, excellent for cooking.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

HUMBERT. Midseason. Medium size, showy, purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow plums.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

STANLEY PRUNE PLUM
Equally Good for Cooking or Eating

Fruit is Food — It's Easy to Grow Your Own
Fancy Bartlett Pears

Always Top

For home, for canning, for market, the best. Ripens during summer.

A golden colored pear, with a red cheek on most specimens. Bartlett mellow and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored will keep till late. Flavor delicious and musky; flesh tender, rich and juicy. One of the finest pears that grows, to eat raw. A mingling of the flavor of Bartlett pear and quince gives about the fine taste of any food this world's folks have. Bartlett tree bear early, produce enormous crops and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartlett Pears Bring Highest Prices

Bartlett pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome, some and appealing that it pays to pack it in fancy containers. Bunches or bunch boxes are best adapted. The fruit ought to be sorted and banded wrapped in tissue paper and arranged in the container practically the same way that you pack apples. Pears are sometimes packed in peach containers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

Sure Cropper—Easy to Grow

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Kousa are the only pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light Vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning pear.

BEURRE ROSS. Large size, fine quality, brings highest market price. Late

BEURRE D'AMOUR. Large, green in color, somewhat yellow when ripe, buttery melting rich vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late

CLAPP'S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GUY LAMBERT. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delicious flavor. Very productive. Extra good for Southern states.

SECKEL. A beautiful and delicious little pear. One of the richest and highest flavored pears grown. Tree dwarf, bears prolific crops. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

APPLE TREES 1945

FIVE-YEAR-OLD BUDDED NURSERY GROWN

Every home owner should plant several of these for fruit and shade, too. These selected trees have already borne apples in our nurseries. Not little "whips", but a developed creation that is full bodied and beautifully branched, of colossal size. Trees you will be proud to own and show your neighbors.

Extra strong rooted specimens—all cared for in our own big nurseries. You get the zenith of perfection—all "Big Fellows"—a picture of health and grandeur. A Harrison Product—offered in limited quantities.

THE VICTORY GARDENER’S DREAM

Plant this spring—under proper care, you may pick and eat apples next summer and fall from your own trees.

Offering America’s popular varieties of apples, listed in order of ripening, available only as follows:

Sorry, but impossible to supply pears, plums, cherries, apricots and nectarines in the Mammoth Size bearing trees. See page 3 for Jumbo Size Fruit Trees.

Mammoth Peach Trees, See Page 14.

ELDORADO Blackberry

A Heavy Yielding Blackberry that Spells Success Everywhere

Long, mammoth blackberries, recognized as the leading variety. Incomparably better in every way than any blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest blackberries. Big, uniform size, makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

LUCRETIA DEWBERRY
LATHAM

Biggest Money-Making Raspberry in America

A Blue Ribbon Winner for the Home and Commercial Grower. It Simply Cannot Be Equalled.

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have grown it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham, we find it a remarkable variety, in every respect, you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cumbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

OTHER RED RASPBERRIES

CHIEF. A new red raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large, excellent quality berries that will withstand shipments to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

NEWBURGH. The new red raspberry which is gaining popularity rapidly. Bright red, excellent shipper, high quality. Earlier than Cumbert. A new commercial leader.

JUMBO GRAPE VINES

Big crops of excellent grades every year, if planted the proper season. 3 feet apart. No other fruit vines need so little attention. Our Jumbo Grape Vines have already spread from the Midwest.

We recommend the following varieties for Jumbo size. Listed in their order of ripening: Fredonia, Warden, Concord, Niagara, Catawba.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00

NEW the Sensational Boysenberry

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.35; 6 for $2.40; 12 for $3.50; 25 for $5.50; 50 for $9.50; 100 for $16.50; 250 for $35.00.

NEW LOGAN

A new black raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

CUMBERLAND RASPBERRIES—The Best Black

The Most Popular Block Raspberry

Midseason to late. This is the most popular blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

BRISTOL. A new Black Raspberry introduced by New York Experimental Station, Geneva, N.Y.

HARRISONS' BIG YIELD GRAPE VINES

BEAR BETTER CROPS
OF BETTER FRUIT

For Bigger and Better Crops Plant

CONCORD

Harrisons’ Super Strain

Blue, midseason. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

AGAWAM. Red, Midseason. Large, thick skin; aromatic flavor. Vine strong, rank grower. Hardy and productive. Ripens with Concord.

CASCADIAN. Red, Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large, flesh pulpy with rich vinous flavor. Quality good. A very desirable variety.

NEW GIANT Cultivated Blueberries

• Profitable to Grow
• Delicious Berries
• Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—$400.00 per acre the third year. They are exquisitely mild, sweet and delicious and bring highest prices on the market. The demand for blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first year. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

BLUEBERRIES—Ornamental as Well as Fruitful

Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size, 4-yr. old, 2 to 3 ft., $3.75 each; 3 for $10.50, 10 for $32.50.

FIVE LEADING BLUEBERRIES Listed in Order of Ripening

Cabot. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

Rancocas. The bush of slender, vigorous, upright habit rather, surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

Concord. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

Rubel. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

Jersey. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Grown by Harrison Brothers, Berlin, Maryland.
Grow Your Own
DELICIOUS! NUTRITIOUS!

ASPARAGUS
It's Easy with

Harrisons’ "Big Yield Strain"

MARY WASHINGTON
Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous True-to-Name
Mary Washington

Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

Asparagus is the ideal vegetable crop to grow, once planted it yields a large crop of delicious asparagus year after year. Plant JUMBO size roots for quickest results.
HARRISONS' ORNAMENTAL

NORTHERN STRAIN

"CHINESE" ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wood shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a Cut-Leaf Birch.

AMERICAN ELM

(Ulmus americana). A noble native tree of great size, wide spreading, gracefully curving branches growing up in a form like the outline of long-stemmed flowers in a tall vase.

AMERICAN PLANE

(Platanus occidentalis). A very rapid growing tree for yard and street planting. The bark is grayish green and peels off during the winter.

SILVER MAPLE

(Acer saccharum). The name comes from the color of the leaves. Underneath, these are the same shade as new, bright silver, on top they are light green. Many of them are curled on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple.

ORIENTAL PLANE

(Platanus orientalis). A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy.

TREES FOR BEAUTY AND SHADE

[26]
**SHADE TREES**

**Stately Pin Oaks** *Quercus palustris*

The tree of trees—no other tree is more beautiful—once planted the pin oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately pin oak for their landscape appeal.

**Beautiful Bronze Color During Autumn**

Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting.

YOU'LL NEVER REGRET PLANTING PIN OAKS.

**RED OAK** (*Quercus rubra*). Growth is slow, eventually grows large. Has extra large leaves. A good shade and street tree.

**NORWAY MAPLE**

(*Acer platanoides*)

Typical maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is slow. Branches and foliage are thick and compact, and the head is round-topped.

**SWEET GUM**

(*Liquidambar styraciflua*)

A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

HARRISON BROTHERS
Berlin, Maryland

**Plant Paper Shell PECAN TREES**

for Shade and Nuts

**PAPER SHELL PECAN**

Medium to large nuts; oblong thin shell; rich flavor. Good grower. The best type pecan grown. 2 to 3 ft., $3.00 each. 3 to 4 ft., $4.00 each.

**BLACK WALNUT**

(*Juglans nigra*)

Rapid grower, spreading branches, large, delicious nuts, prolific bearer. 2 to 3 ft., $2.00 each.

**Figs**

To Tempt the Appetite

**BROWN TURKEY** Medium to large size; copper-brown skin, flesh white. Not hardy North. 2 to 3 ft., $1.75 each; 10 for $15.00.

**AMERICAN FILBERT**

(*Hazel Nut*)

The old family favorite. Small, attractive bush, yielding abundant crops of tasty round nuts. Bears very young. 1½ to 2 feet, $2.50 each.
BERLIN, MARYLAND GROWN

GORGEOUS LILACS

Lilacs are marvels of beauty and elegance. They are one of the first plants to bloom in the spring. Perfectly hardy in any locality. We can supply the following colors: White, Purple, Pink and Blue. State color desired. Prices: Field-grown plants, $1.50 each; 2 for $2.80; 10 for $13.00.

PINK FLOWERING ALMOND

A lovely dwarf flowering shrub. Profusion of double pink blooms during early spring. Prices: Grafted plants, field grown, 1½ to 2 ft., $2.50.

ROYAL BLUE HYDRANGEA

Old favorite southern hydrangea. When winters are severe we suggest heeling in. Large balls of blue flowers, very attractive large leaves. Color depends on acidity of soil. Field grown plants, $1.50 each; 2 for $2.80.

FLAMEBUSH

(Chaenomeles Japonica Rubra Grandiflora)

This remarkable grafted shrub is one of the first to bloom in the spring. Dazzling deep red flowers followed by fragrant, squirrel-shaped fruits. Waxy dark green foliage. An ideal specimen plant to furnish early coloring in any planting. Prices: Grafted plants, field grown, 1½ to 2 ft., $2.50.
Everywhere people are making their homes livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well-kept lawn planted to shrubs and flowers.

**ALTHEA** or **ROSE OF SHARON** (Hibiscus syriacus). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

**Buddleia Magnifica.** Now and undoubtedly the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

**DEUTZIA, PRIDE OF ROCHESTER.** Double white flowers, slightly tinged with rose, appear in mid-June.

**DOGWOOD, RED-BRANCHED** (Cornus alba sibirica). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

**GOLDEN BELL** (Forsythia). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

**HONEYSUCKLE BUSH** (Lonicera morrowii). Early white flowers in June, followed by red berries.

**SPIREA BILLIARDI.** A hardy type of spirea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

**SYRINGA, SWEET MOCK ORANGE or GARLAND** (Philodendron coronarium). Of upright habit, and produces in June a wealth of white, fragrant flowers.

**SWEET-SCENTED SHRUB** (Calycanthus floridus). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

**TAMARIX, AFRICAN** (Tamarix africana). Feathery gray-green foliage, very showy.

**TARTAR HONEYSUCKLE** (Lonicera tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

**WEIGELA, PINK** (Weigela rosea). The most popular weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

**CREPE MYTLE** (Lagerstroemia indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1 1/2 to 2 ft., each $1.50.

**FIRETHORN.** A beautiful shrub covered with profusion of white flowers in early spring, followed by bright orange berries which hang on all winter. 1 1/2 to 2 ft., $2.50 each.

**HYDRANGEA PEE GEE** (Hydrangea paniculato grandiflora). Large flowers, first showy white, then pink changing to reddish bronze in the fall. Blooms midsummer to fall. 18 to 24 inches, 90c each.

**QUINCE FLOWERING** (Cydonia japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 feet, $1.00 each.

**SPIREA ANTHONY WATERER.** Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, $1.00 each.

**WEIGELA EVA RATHKE.** Very attractive deep, carmine-red flowers, making a very showy shrub. 1 1/2 to 2 feet, $1.00 each. 2 to 3 feet, $1.25 each.

**BEAUTY BUSH.** Pink tubular flowers, heavy bloomer, hardy. 2 to 3 feet, $1.25 each.

**The Glorious Spirea Van Houttei**

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting, and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have on extra fine supply of first class plants this year and are pricing them especially low.

**NANDINA DOMESTICA.** Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long pinnacles followed by masses of small, bright red berries which are retained all winter. 12 to 18 inches, $1.50 each.

**Harrisons' Shrubs Add Color and Variety to Your Planting**
What a Difference a Few Evergreens Will Make in the Appearance of Your Home

Berckmann's Golden Arbor-Vitae

*Thuja occidentalis compacta*

Dwarf, compact evergreen. Foliage a bright lustrous yellow. Fine for adding color in the planting. Highly admired by all who see it. 12 to 15 inches...Each $2.40 2 for $4.40

Spreading Yew

*(Taxus cuspidate)*

The beautiful yew at moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape.

Pyramidal Arbor-Vitae

*(Thuja occidentalis pyramidalis)*

A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming, and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a home makes a superb showing. Our pyramidal arbor-vitae are grown with extreme care and each one is a specimen.

Do Not Confuse Harrisons' High Quality Evergreens with Bed-Grown Sticks. This Type of Stock May be on Tall as the Plants We Offer. They Do Not Have the Body and Are Useless for Immediate Landscape Effect and Oftentimes Require Several Years Growth Before They are Satisfactory.

Harrisons Grown Evergreens are Famous for Quality, Vigor and Beauty
Dear Friend—

Due to war conditions and the drastic paper shortage, we are not issuing as many catalogs as usual. Some of your friends may want to plant Victory Fruit Gardens and we know they would appreciate you loaning them this book (after you have sent it in your own order) so they too can plant a Victory Fruit Garden.

We will appreciate this favor and so will your friends and neighbors.

Sincerely yours,

HARRISON BROTHERS
Baltimore, Maryland

"The Rare FRANKLINIA"
(Franklinia Altamaha)
Beautiful blooms and blaz ing fall foliage bring beauty to any planting. Flowers start opening in mid-August and continue to open until hard frosts. The flower buds appear like small balls covered with whitish green satin; when as large as marbles they unfold; the guard petals emerge, satiny snow-white, elaborately frilled and pleated. The snowy frilly choice, 3 inches in diameter and of piquant irregularity, holds a sumptuous mass of the rich crimson large stamens having a delicate balmy fragrance. The young leaves unfold a charming, delicate, bronze red, at maturity they are 5 to 6 inches long by about one-third as wide, a rich dark green with red veining. In autumn the whole tree blazes a rich warm color. Produces a beautiful effect in any planting. 2 to 3 ft., $3.50 each.

MAGNOLIA SOULANGEANA NIGRA
Small tree or bush with large, 9-petal dark pink blossoms before the leaves in the spring. One of the most beautiful flowering springs. Price: 1½ to 2 ft, $4.00 each.

The Best Selections for 1945 Plantings—Grown by Harrison Bros. Nurseries at Berlin, Maryland
**PLANTING KEY**

6. Spiny Greek Juniper
7. Retinaspura Plumosa
8. Hicks' Yew
9. Dwarf English Boxwood

**A TYPICAL FOUNDATION PLANTING**

**BEAUTIFUL RETINOSPORA**

Dainty and Feathery—So Picturesque in the Foundation or Rockery

**PLUME-LIKE RETINOSPURA** (Retinaspura plumosa). A handsome evergreen with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

**VEITCH'S SILVER RETINOSPURA** (Retinaspura squarroso veitchii). Foliage silvery blue, feathery and dense, giving a soft, woolly appearance. Broad, pyramidal outline, can be kept to any height by trimming. One of the best retinospuras.

**GOLDEN PLUME-LIKE RETINOSPURA**

Our Most Popular Golden Tinted Evergreen

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Featherly, feathery foliage can be kept pruned to any size. No home foundation plantings are complete without this remarkable healthy evergreen.

</tbody>
</table>

**HICKS' YEW** (Taxus cuspidata Hicksii). A slower growing form of yew which is very similar to the Irish Yew but it is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than any other form of yew. We can unhesitatingly recommend it for plantings in all sections. It has proven to be perfectly hardy. If extreme cold or narrow effect is desired it can be obtained by trimming the sides of the plant when it is small. This variety is extensively used for making hedge clumps.

**IRISH YEW** (taxus baccata Hibernica)

**Fine Soft Lustrous Foliage**

**An ARISTOCRAT from OLD IRELAND**

This evergreen is the aristocratic member of the yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we have a few specimen plants in our nurseries from which we were able to propagate.

RED-LEAVED BARBERRY
(Berberis thunbergii atropurpurea)

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage dependant on for colors.

HARDY VINES
NATURE'S DRAPERIES

SPURGE (Pachysandra terminalis). An evergreen ground cover. Will grow in dense shade; suitable for planting beneath trees where grass will not grow. Strong plants, 30c each; 2 for 45c; 10 for $2.00.

CHINESE WISTERIA. A rampant growing, clinging vine. Blue flowers in large drooping clusters during May and June. 60c each; 2 for $1.10; 10 for $5.00.

ENGLISH IVY (Hedera Helix). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. 50c each; 2 for 90c; 10 for $4.00.

HALL'S HONEYSuckle. Dark, glossy green foliage; fragrant flowers from July to fall. 50c each; 2 for 90c; 10 for $4.00.

WINTER CREEPER (Euonymus radicans). Very desirable evergreen vine for covering banks and walls. Hardy plants, $1.90 each.
AZALEA—A Miracle of Loveliness

AZALEA HINODEGIRI

Deep Coral-Pink Flowers

AZALEA AMOENA

Rosy Purple Flowers—Evergreen Foliage

A dome dwarf growing shrub with slender branches and semi-double flowers of a bright rosy purple color. Evergreen foliage that makes it attractive when out of bloom. Grows satisfactorily in shade as well as in full sunlight. More Hardy than the other kinds and its wealth of bloom in the early spring is a delight to everyone who sees it.

BOTANICAL AMERICAN

Rosa sempervirens

Semi-double flowers, rosy pink. These plants are well adapted to the average New England climate and will do excellently in the average southern New England garden. They are excellent for the city flower bed, growing in sun or partial shade. They bloom profusely from late May to early June. The foliage is green in summer, turning red in fall. Each 1 to 2 feet 1.75

PIERIS FLORE BUNDA

Evergreen, white flowers, in May. Good deep green foliage, best in shady places. Very hardy.

Each 12 to 18 inches $2.25

BERBERIS JULIANAE

A beautiful and rare evergreen variety. It stays perfectly green during the winter and blends well with other evergreens and broad-leaved evergreens.

Each 2 to 3 feet $1.75

LIGUSTRUM LUCIDUM

Large, glossy, dark green leaves, white flowers, black berries in winter.

Each 15 to 18 inches $1.75

DWARF ENGLISH BOXWOOD

(Buxus sempervirens Suffruticosus)

A widely known and popular form of dwarf boxwood. It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings; can be trimmed in various forms.

EASY TO GROW. Dwarf English boxwood is easy to grow and will thrive in most every type of soil. After this plant once becomes established, it does not require any particular attention. It is practically immune from all diseases and insects. Can be planted in the full sunlight and semi-shade locations.

LARGE SPECIMEN PLANTS SELL AT HIGH PRICES. Dwarf English boxwood has been called the Century plant, due to its ability to live over a hundred years. A few years ago, large plants sold for fabulous prices, many selling for hundreds of dollars.

IDEAL FOR DWARF HEDGES. Make your home grounds the show place of your community. Dwarf English boxwood is the ideal low growing plant to add the finish touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be trimmed if desired, but not necessary, unless you want the strictly formal effect.

EVERGREEN PLANTS

BUSH ARBUTUS—Everblooming

BUSH ARBUTUS, Abelia

Grande dining burs are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

Each 2 for 10 for

1 to 1 1/2 feet $1.50 $2.70 $11.50
1 1/2 to 2 feet 2.00 3.80 17.00
2 to 3 feet 2.50 4.70 21.00

AMERICAN HOLLY (Ilex opaca)

The Christmas Holly. Its bright green, spiny leaves and brilliant red berries make it one of our hardiest plants.

Each 2 for 1 1/2 to 2 feet $3.00 $6.00

CRENATA HOLLY. A much branched evergreen shrub with oval crenate leaves. Clusters of black berries form during the fall.

Each 1 to 3 1/2 feet $1.50

PINK RADIANCE ROSE

GNOMI DAWN ROSE

RED RADIANCE ROSE

BUSH ARBUTUS—The Spring Beauty

SOUTHERN MAGNOLIA (Magnolia grandiflora)

The finest large growing broad-leaved evergreen tree. Large glossy evergreen leaves, handsome white flowers during summer. Trees grow pyramidal in form and often attain 20 feet or more in height. Its flowers are followed by large pods covered with brilliant red seeds.

Each 1 to 2 feet $2.75 $5.00

2 to 3 feet 3.50 6.30
3 to 4 feet 4.50 8.00
4 to 5 feet 5.00 11.00

DAPHNE

(Daphne cneorum)

Sweet Scented Geranium Flower

Its dwarf spreading branches covered with small, slender leaves make pretty trails of blue-green foliage, which is evergreen. The real thrill and joy comes in April and May when the soft pink flowers appear in such profusion as to make the entire plant appear as a low pink mound. They fill the air with a particularly sweet and penetrating fragrance. Truly one of Nature's finest. Strong plants, 9 to 12 inches, $2.00 each.

PLANTS

Each 2 for 10 for

1 to 1 1/2 feet $1.50 $2.70 $11.50
1 1/2 to 2 feet 2.00 3.80 17.00
2 to 3 feet 2.50 4.70 21.00

EUONYMUS

Columnar upright, glossy evergreen foliage. Thrives under adverse conditions. We offer 2 kinds: Solid green leaves or leaves variegated with golden color.

Each 12 to 18 inches $1.50

EVANGELINE

One of our beautiful, popular and satisfactory broad-leaved evergreens. The graceful drooping stems and branches are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.
